BIRoul PERMANENT

Nr. 803 din 6.05.2016

**privind participarea la cea de a XXII a Conferință Internațională a Fundației pentru
Unitatea Națiunilor Creștin Ortodoxe
Pirot, Serbia, 11-14 aprilie 2016**

În perioada 11-14 aprilie 2016 s-au desfășurat la Pirot, Republica Serbia, lucrările celei de a XXII-a Conferință Internațională, organizată de Fundația pentru Unitatea Națiunilor Creștine Ortodoxe (FUNCO), cu tema „Perspectiva creștină a problemei refugiaților în lumina realităților actuale”.

La Conferință au participat peste 60 reprezentanți ai parlamentelor și altor organizații politice, sociale sau religioase din 24 de țări.

Delegația Parlamentului României la AIO a fost reprezentată de domnul deputat **Petru Andea** (PSD), președinte executiv al Grupului Ecumenic de Rugăciune din Parlamentul României și membru al Secretariatului Internațional al AIO.

La sesiunea de deschidere a Conferinței au participat, prezentând alocuțiuni, domnii Tomislav Nikolic, președintele Republicii Serbia, Aleksandar Vulin, ministrul muncii și problemelor sociale din guvernul Republicii Serbia, A.V. Chepurin, ambasadorul Federației Ruse în Republica Serbia, V.N. Chushev, ambasadorul Republicii Belarus în Republica Serbia.

De asemenea, pe adresa Conferinței, au transmis mesaje Preafericitul Irineu, patriarhul Bisericii Ortodoxe a Serbiei, Preafericitul Ilia al II-lea, patriarhul Georgiei, Preafericitul Neofit, patriarhul Bulgariei, Mitropolitul Rostislav din Cehia și Slovacia, precum și domnul Serghei Popov, deputat în Duma de Stat a Federației Ruse, președinte al Uniunii Interparlamentare a Ortodoxiei.

În cadrul Conferinței au prezentat intervenții peste 45 participanți din Serbia, Rusia, Bosnia și Herțegovina, Belarus, Liban, Palestina, Iordania, Ucraina, Germania, Bulgaria, Austria, Belgia, Georgia, Polonia, Cehia, Rep. Moldova, Kazahstan, Muntenegru, Kosovo, Estonia, Lituania.

Domnul deputat Andea Petru a prezentat o intervenție în tema „Migrația – evoluții istorice și recente”.

Domnia sa a precizat faptul că istoria României este legată, mai mult decât am putea crede, de fenomenul migrației. În primul mileniu de creștinism, actualul teritoriu al României a cunoscut valuri după valuri de populații migratoare.

În opinia deputatului, în prezent cauzele migrației românilor sunt în principal de natură economică, spre deosebire de perioada dinainte de 1989 când erau preponderent de natură politică.

În acest context, deputatul Andea apreciază că România împărtășește preocuparea comunității internaționale privind gestionarea comună a fluxului de refugiați. În acest scop a fost elaborată o Strategie Națională privind Imigrația pentru perioada 2015-2018, care să asigure integrarea socială a persoanelor care au dobândit o formă de protecție în România.

România are convingerea că stabilizarea zonelor de conflict poate stopa valul de refugiați care ajung în Europa și poate contribui la reîntoarcerea, în siguranță, a persoanelor refugiate în zonele de origine.

Totodată, domnul deputat Andea a precizat că România susține continuarea dialogului cu țările de origine și de tranzit pentru concretizarea deciziilor adoptate în ultimii doi ani la Conferințele la nivel înalt pe tema migrației.

Raportul organizatorilor cu privire la tema supusă dezbaterii Conferinței a fost prezentat de domnul profesor Valerii Alexeev, președintele FUNCO.

De asemenea, la finalul Conferinței Internaționale FUNCO de la Pirot, a fost elaborat și transmis un Comunicat, realizat pe baza raportului și a intervențiilor participanților.

Raportul și comunicatul sunt anexate.

Participanții la Conferință și-au exprimat compasiunea față de milioanele de refugiați din Asia, Orientul Mijlociu și Africa, nevoiți să-și părăsească țările natale din cauza terorismului, confruntărilor militare și intoleranței religioase. A fost condamnat procesul de decreștinare din aceste țări care conduce la fenomene de dezumanizare, cum sunt acțiunile ISIS. Recentele atentate din Bruxelles, soldate cu numeroase victime, demonstrează natura barbară a ISIS. S-a apreciat că înțelegerile încheiate între Uniunea Europeană, Turcia și alte state cu privire la plata unor contribuții financiare pentru returnarea emigranților reprezintă o încercare cinică de rezolvare a problemei acestora.

Conferința a apreciat eforturile FUNCO de a influența cercurile politice și liderii comunităților religioase din diverse țări pentru a discuta urgent, dezvoltând dialogul intercultural, promovând valorile spirituale și culturale creștine, respectând drepturile omului, asigurând păstrarea tradițiilor și identităților naționale.

Programul Conferinței a oferit participanților și prilejul de a vizita două mănăstiri ortodoxe, Sukovo și Temsko, din apropierea orașului Pirot.

În continuare, în perioada 14-17 aprilie 2016 s-au desfășurat la Sparta, Grecia, lucrările conferinței cu tema „Produsele mănăstirești și micii producători în zona ortodoxă. Eforturi și perspective comune”, organizată de Secretariatul Internațional al Uniunii Interparlamentare a Ortodoxiei (UIO).

La Conferință au participat peste 60 reprezentanți ai parlamentelor, instituțiilor publice și bisericilor ortodoxe din Grecia, Rusia, Ucraina, Finlanda, Muntenegru, Serbia, Franța și Armenia.

Din România au participat la Conferință domnul deputat Andea Petru, membrul Secretariatului Internațional al U.I.O, preotul Teofan de la mănăstirea Nera, precum și un grup de șapte călugărițe de la mănăstirile Nera și Dragomirna.

La deschiderea Conferinței au participat, rostind alocuțiuni, domnii Ioannis Amanatidis, secretar general al AIO, deputat în Parlamentul elen, Ministru al Afacerilor Externe, domnul Evangelos Apostolos, Ministru grec al dezvoltării rurale și alimentației, Înaltpreasfințitul Efstathios, mitropolit al Spartei, domnul Evangelos Valiotis, primarul Spartei, s.a.

În cadrul Conferinței a trimis un mesaj domnul Serghei Popov, membru al Dumei de Stat a Federației Ruse, Președintele AIO.

Pe parcursul celor două zile de desfășurare a Conferinței, au luat cuvântul peste 20 de participanți, care au prezentat și au dezbătut o serie de probleme vizând activitatea de producere și valorificare de către mănăstiri a produselor acestora.

La expoziția organizată cu prilejul Conferinței a fost prezentată o gamă largă de produse alimentare, produse farmaceutice, produse cosmetice, vinuri, ceramică ș.a.

Principalele probleme supuse discuțiilor s-au referit la:

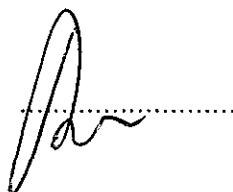

- asigurarea calității produselor;
- certificarea produselor, conform legislației U.E., respectiv a legislației naționale;
- promovarea produselor, organizarea, finanțarea și susținerea campaniilor de promovare;
- vânzarea produselor, crearea unor rețele de desfacere, inclusiv prin intermediul internetului;
- asigurarea competitivității și succesului comercializării produselor pe piața liberă;
- rezolvarea problemelor legate de ambalarea produselor, inscripționarea și etichetarea ambalajelor etc.

Experiența unor mănăstiri din România în producerea și valorificarea produselor a fost prezentată de o călugăriță de la mănăstirea Nera, alocuțiunea fiind ascultată cu foarte mare interes. Totodată, produsele mănăstirii Nera, prezentate în cadrul expoziției Conferinței, s-au bucurat de o atenție deosebită, fiind pus accentul în special pe produsele farmaceutice.

A reținut atenția și prezentarea realizată de preotul Mikael de la mănăstirea New Valamo – Finlanda, care a ținut să precizeze că au început și producția de whisky, competitivă pe piața liberă.

Programul Conferinței a inclus și un serviciu religios la Catedrala Mitropolitană cu hramul „Buna Vestire”, precum și vizite de studiu la vestigiile orașului medieval Mistra, din imediata apropiere a Spartei.

Deputat Petru ANDEA

Report
of the President of the International Foundation
for the Unity of Orthodox Christian Nations (IFUOCN) Professor VA Alekseev
at the XXII Annual International Conference of IFUOCN
on the theme: "Christian comprehension to refugees problem in the light of actual reality"

Piotr, Serbia, 11 april 2012

Your Eminences!

Your Excellencies!

Ladies and gentlemen, dear participants and guests of the conference!

Dear friends, brothers and sisters!

The theme of our conference today is the **most urgent agenda for the country's political class** not only in modern Europe but also in Africa, Asia, the Middle East. I recently had to speak on this topic in a very competent and distinguished audience, and in this report I once again give some of its conclusions and observations, that have not lost their actuality.

Obviously, **the world was moved and millions of people have been driven from their homes** in a number of reasons — **the threat of mass terrorism, religious intolerance, poverty, racial and national hatred and because of selfishness, deceit and covert political scenarios of global political players.**

Whatever it was, as a result of this **new challenge in the face of deliberate mass refugee movement** (there is reason to believe that this is only the beginning of a previously unknown threats) the mankind has been forced to suffer, pay enormous sacrifice and seek a way out of a very difficult situation. As Orthodox community, political, religious leaders, experts and specialists from different countries, we need to understand the problem in all its dramatic sharpness and contradictory nature, to find ways to solve it, **because all the Orthodox ecumene was drawn into the most dangerous millstones of this terrible call with its enormous sacrifices.**

It is necessary to identify the objective, historically conditioned problems of the contemporary refugee movement associated with long-standing distortions and imbalances, social and economic inequality of peoples, historical backlog and even **drop out of the actual time of entire layers and categories of the population**, centuries-old national contradictions and religious complexities, of **current man-made by global players large-scale political upheavals**, their throw into hot today's reality of the card of religious fundamentalism and extremism, **growing and pushing into the arena of the mobilized international terrorism units for solving problems of transnational capital and achievement of their own selfish national and state goals.**

Refugee problem for Christianity is not new. Christianity have faced with this problem face to face from its very outset in apostolic times. In the history **Orthodox Christians** were many times persecuted, massacred and expelled from their seats. But every time in a new habitat they **harmonized** by their religious and spiritual practice **the whole environment**, bringing a peaceful, humane message to other nations. **However, the current refugee problem is closely targeted, woven with far-reaching consequences into the global destruction scenario, with a clear division of roles among its leading players.**

Each member of this gigantic cruel project has also his own goals, which not always coincide with the expectations of other players. It should be noted that at this short-term stage, as a critical moment, **the interests of the players in this global scenario matched**, even though they are located in different parts of the world: some of them represent Persian Gulf oil sheiks' dynasties, other political forces on the captured once post-Byzantine space weave bloody intrigues in their own dreams of **revival of new-osmanism under their own commandment** and insidiously **revenge on Europe** for old and new grievances, other self-styled "**masters of the world order**" from over ocean create a global game, **causing controlled chaos throughout the whole Greater Middle East**, creating by the way, although not by chance, **serious problems for the Old World**, while still calling themselves "**a friend of Europe**".

As a result, Europe has found itself in the crosshairs of crying problems, also because of rough, extremely dangerous **political mistakes of the European Union leaders.** It is exactly in Europe that surged and flowed across the continent, **prudently directed from outside, the huge influx of refugees from the East, Asia and Africa**, bringing with it a huge number of potential problems: from the threat of mass and web terrorism to infectious and epidemic diseases, from the social unsettled millions of immigrants to the **collapse of the whole idea of a long arrayed common European home**, with its tolerance, multiculturalism, postmodernism, fed and safe comfort, well-functioning economy.

As it is known, the current refugee movement didn't appear itself, but as a result of the expanded by the USA "**global war on terror**". We also know the beginning date of this campaign — 2001 — as a response to the terrorist attacks in New York on September 11 although the nature and essence of those events still **remain very vague.** Nevertheless, the **United States declared war against the Salafi "Al-Qaeda"**, which was developed on the spaces of almost the entire Muslim world, creating a huge problem — a **refugee movement from the war-torn spaces.**

The current conflict and the explosive situation in the world is caused by the **irresponsible policy of a global leader in the face of the USA ruling class.** Today this truth is obvious and does not require rigorous evidences. The Americans are well aware of this. I refer to the opinion of at least some of the very well-known citizens of this country. The famous intellectual **Noam Chomsky** argues that the **United States carries out the worst policy in the world.** "**This is a global campaign of murders**", — he said. Another American celebrity **Henry Kissinger** recently said that the USA should not intervene in international conflicts, because its **decisions are made by incompetent people.**

The problem of modern mass refugee movement is a purely political problem, but it requires its **Christian comprehension** and measurement. Without such an approach this tremendous problem can not be understood in its entirety and, therefore, **can not be solved.** What should be born in mind in the first place? First of all, it should be understood that the authors and initiators of this global challenge in the form of **mass refugee movement** have planned and provocatively put it in a large-scale basis for **Christian-Muslim confrontation** and strongly contributed to its bitterness and an increase to the size of **conflict between civilizations.**

Indeed, we see a deployment of the encouraged **outcome of the active part of the Afro-Asian population to the Old World.** The result is a **hard clash of cultures, behavioral types, a rapid change in the religious map of Western and Central Europe.**

One of the main allies of German Chancellorin Angela Merkel's ruling coalition the leader of the Christian Social Union (CSU) and the Bavarian Prime Minister Horst Seehofer called the fatal political mistake the September (2015) Merkel's sole decision of **indefinitely and uncontrollably let refugees into the country**. Despite the fact that the countries of the Old World as a result of refugee movement resettled about one and a half million people in the past year, **most of which are native Muslims**, and that the number of displaced persons, it would seem, for the hundreds of millions of Europeans should not be a threat, yet **the Islamic factor explodes the prevailing ethnic and religious balance of the continent** clearly not in favor of Europe.

The reasons for this are several. One of them is the fact that religious and spiritual space in Europe as a result of the long **liberal sweep** turned sterile defenseless against organized **spiritual and cultural invasion from outside**. European Christianity, especially its western wing, is now a **demoralized force**. The Europeans, accustomed to "their local" and generally not numerous Islam in a moderate manner, found themselves shocked by the force of the introduced model of **Islam in a radical package** of mainly aggressive **Salafi sense**, which does not hide its aims to **win the largest possible cultural and spiritual space**.

The fact that **the problem of refugees** and, if not sad to admit it, **the problem of terrorism** in the framework of **Islamic radicalism** are closely related and they are in need of a deep, including the **theological understanding**, recently stated the Holy Patriarch of Moscow and All Russia Kirill at the meeting of the Supreme Church Council of Russian Orthodox Church. "I believe terrorism can not be separated from the general development of civilization... There is something going wrong with us, and terrorism — is a part of this wrong," — Patriarch Kirill said.

Catholic bishop from Hungary László Kiss-Rigo states that the flow of refugees is a **deadly threat to "continental Christian values"**. "These are not refugees, — he says, — these are the real invasors". These people come with the words "**Allah Akbar**" on their lips and **want to prevail in Europe**, according to the Catholic hierarchy.

It is no secret that the sponsors and charterers of mass refugees movement were the countries where **Salafi Islam** is not only the dominant religion, but **the ideology of the state**. Refugee project was thought prudently by parties concerned, among whom there were also forces from far beyond the ocean.

Initially, the refugees became Christians the Middle East and North African countries, against which Islamic extremists, encouraged and paid by sponsors, unleashed a real genocide, and Christians in search of salvation flocked to Europe, once founding themselves on the way in the **prudently arranged traps** — the pre-prepared by the Turkish authorities camps — storage rings on the Syrian-Turkish border.

It is impossible not to **express compassion** for the millions of refugees from Asia, the Middle East and Africa, **have been driven** from their native homeland as a result of the **mass religious intolerance and brutality** of salafit-terrorists. We should admit bitterly that the process of **forced dechristianization** comes to his sad end in the entire region of the Middle East, **christians are expelled** from their historical locations — **from the places where Christianity was born**. **Dechristianization leads to the dehumanization** of the whole modern civilization - that's what is the logic of mass Christians refugees movement in Europe.

But after this first and relatively small wave of refugees (as we know, at the moment there are not so much Christians left in the Middle East and North Africa) as a result of **actions financed by the concerned parties**, followed the next, more ambitious and rather aggressive waves of refugees in Europe, consisting **mainly of Muslim migrants** from Afghanistan, Iraq, Syria, Pakistan, Somalia, Libya, Turkey, and Egypt. **They have created a critical mass of refugees, surging from Turkish camps to Europe**, sweeping on their way all sorts of barriers. A powerful incentive for refugees on their way to Europe has become a call of German Chancellor Angela Merkel, called them to the Old World.

In this appeal could be heard the voice of conscience of Europe, if he had not drowned out by the **cynical practice of EU leaders** towards refugees. Such callous, as unreasoned attitude to the **fate of hundreds of thousands of people** rushed at the call of the EU leadership from their homes in their native places in search of a better life in the Old World, is simply **amazing**. First, they are called in Europe and millions of refugees from **Afghanistan, Syria, Pakistan, Iraq, Africa** flock to the West, but then the EU sets quotas and in accordance with the **secret plans** decides to **deport back** most of these refugees. With this a kind of "trade" agreement is concluded with Turkey and other Middle Eastern countries, so they would **deport them back for the EU money**. The **human drama** of these unfortunate people does not matter anyone.

Those who provoked this gigantic refugees campaign, who **financed and encouraged the inter-religious and civil conflicts** in Egypt, Syria, Libya, Iraq and other countries — **supported by the United States Qatar and Saudi Arabia** — did not accept refugees, but generously **paid and strongly contributed to the creation of accumulation camps** for millions of refugees in southern Turkey and their further transportation to Europe according to the plan of the Turkish authorities. Also, the Saudis and Qatar preoccupied the massive construction of **mosques of Salafi sense** for Muslim refugees in Europe.

The aggressive attack method of **Islam penetration** in the previously unattended areas, the introduction into a new social environment is inherent in the Muslim religion initially. Once the Prophet Muhammad practiced this method, which in Arabic sounds like "**bandit raid**" by which Islam conquered new territories and increased the number of its adherents/

To make the **aggressive salyafi Islam** even more destructive power it was not enough to **push him to Christianity**, it was necessary to **bleed together** in a mortal combat **within the world of Islam** its two main branches — **Sunnism and Shiism**. The energy, born of this conflict, like the uranium split, turned out a monstrous destructive force and the **Sunni branch Salafi Islam in the terrorist guise** challenged the world community.

Recent terrorist inhumane acts in the **Brussels airport** and in the city metro with numerous victims once more showed the **savage grin of Salafi barbarism**.

The famous German psychiatrist, professor at the Baden-Württemberg University Jan Ilhan Kizilhan recently issued a stunning report on its work on **religious and cultural aspects of psychotherapeutic rehabilitation** of **iezid women** victims of Islamic State militants' atrocities. On the basis of its deep and extensive research he came to the horrifying conclusion. Professor Ya.Kizilhan asserts that **ISIL militants have no psychosis nor schizophrenia**, they live in the real world, but by committing its atrocities, they think not like everyone else. **Their goal** — the **destruction of mankind, the destruction of life in general**. This is the maxim of their religious myth as a **quasi sacred debt**. Even fascism did not know such an imperative form of cruelty, destruction of life in this animal form, says Professor Ya. Kizilhan.

In fact, this is the **barbaric Salafi response to the spiritless Westernization and globalization**, with its destructive actions towards traditional family, feminism, pluralism, the so-called LGBT culture, but it is also a kind of **Islamic-fundamentalist reaction to injustice, deformity of the world order**, social inequality and poverty created by the capitalist hegemony of the West. This is a kind of account in the form of **sublimated hate of the Muslim world, brought by the Salafis to liberal West**, an attempt to take a cruel revenge for centuries of oppression and humiliation. This is a **project of the radical Muslim world order in a barbaric way** offered by Islam extremists.

Islamic protest is a global phenomenon of the modern world and it must be taken very seriously. The problem will **not disappear** with the military defeat of the Islamic state on the main fronts. In place of this confrontation will come **another one** because the Muslim world **has woken up** and is going to **consolidate its various forces in the struggle with the West for a place under the sun**. The Islamic world will **require its part of the world's wealth** and would have to negotiate with him. We faced **two ideologies — the Islamic one** (and it is already clear that it is as a kind of "third way" of development) and the **Western liberal**. History has not yet said its last word, **which of the two ideologies will appear more strongly**.

Islamic radicals, supported by the United States and as this is not enough, also by the "short-sighted" European Union, **intend to break the existing world order**, to destroy modern civilization, **based on Christian values and meanings**. So do not seem accidental powerful campaigns to discredit, destruct and erode of **traditional Christian cultural and spiritual values** in the different countries of the world — primarily in the USA and Western Europe — developing a **global secular-liberal project**, involving the legalization of homosexual marriages, the removal of all kinds barriers to the promotion of non-traditional sexual relations, reducing the threshold of intolerance to pedophilia, etc.

There is no doubt that in the expanded **global hybrid war for a radical change in the existing world order**, started by the **United States** in order to **maintain its global dominance** and use this self-interest of a number of its partners and satellites, great importance is given to a new terrible weapon — **soft aggression in the form of mass refugee**, cleverly directed to those countries that need to weaken or even bring down their social infrastructure, to create in these countries the **critical stress as a result of the creation of inter-religious and intercultural conflicts** in connection with the appearance in the current socio-cultural and religious-spiritual environment of completely atypical new actors.

Recent events in Cologne and several other cities in Germany — at last count, in the 12 of the 16 federal German lands — have shown how sinister and **dangerous for European everyday reality** can turn the **problem of Muslim refugees** who over the upcoming 2016 New Year Eve organized and coordinated in the order predetermined beforehand by its moderators, mass atrocities, committed by thousands of excited by alcohol and impunity young men against the local population, they beat, robbed, raped and abused **women and children**. Abuse of women, and even in large numbers, and as brutal as it was, according to the eastern mentality means the **declaration of war to the enemy**, and the **unavenged evil — is a sign of the weakness of the enemy and the signal to continue the attack with the aim to finish the defeated enemy**. The unpunished sexual violence against women of the enemy in an indisputable evidence of the **victory over the enemy and the capture of its territory**. Also, the other attributes of their domination the Muslim refugees may soon present to defeated Europe. **Not recognize the current rape of Europe is criminally shortsighted.**

The European Union is now one of the few centers of the existing world system, **the center of which, by definition, is Germany**, carrying out an extremely liberal policy of the **pacifist wing**. It seems that **Frau Merkel is most afraid just of the fatal revival of Aryan spirit of the German nation**, and it is adding the speed to ultra-liberal policies of her government, encouraging by her initiative an even greater influx of Muslim refugees in Germany, **extinguishing thereby ostensibly the potency of conservative-protective and revanchist tendencies** in the sentiments of the people.

But such a liberal policy, on the contrary, **generates directly opposite results**. **The raiting of German Chancellor Angela Merkel is rapidly reducing** in accordance with the sharp decline of confidence in its policies, also in her party and among her political allies. The picking up speed movement under the slogan **"No to Islamization of Europe!"**, which began in the east of Germany, quickly found its supporters in the center and in the south and the west of FRG.

In Germany begin to grow **isolationist**, not just anti-migration sentiments, began to arise active civil-society groups and organizations acting under all foreseeable looming slogan: **"Germany for the germanics"**, which implies a very early emergence of a more **specific and sinister slogan "Germany for Germans!"**.

And even more, the new right-wing party **"Alternative for Germany"**, has just won the regional elections in several federal states of Germany, and immediately tightened its positions so that some of its leaders and activists are now demanding from the government of such harsh measures against illegal immigrants, as **even the shooting them at the borders in case of disobedience**.

It is an important event in the series of the revival of right-wing sentiment held recently in Germany — 70 years after the defeat of fascism first time in the post-nazist Germany not secretly, but quite legally with a relying presale advertising **came out the reprint in mass copies of the book of Adolf Hitler "Mein Kampf."** The publication, although with critical scientific comments (unless they are?), and the cost of 59 euros per copy, **with a lightning speed was bought by the Germans**.

Liberalism is retreating under the pressure of right-wing forces in the Netherlands, Belgium, Poland, Britain, the Baltics, Central Europe. Until recently it seemed that the **right-wing were finally defeated by liberals** and no longer return to the political scene, but the problem of refugee and religious extremism **dramatically changed the global agenda**. The Rights return, but do not know what to do with the Liberals running trend of the world economy and politics.

The main cause of world disharmony is the ongoing **furious concentration of capital**. At present, according to well-known international organization Oxfam, **the assets of 62 top billionaires equal the total of 3.6 billion people on the Earth**. The size of the total capital of **1% of the richest people in the world** for the first time exceeded the currently means all the other 99% of the world population. **That global inequality generates all the problems of the world** and in every way impedes the search for ways of harmonious human development in all areas — from financial and economic to the social and spiritual.

Greedy oligarchs pushed aside the political players and take himself the **most important decisions**, based solely on the interests of their own benefit, thereby exploding all norms and rules of the **modern world order**. America now is openly governed not by the President and the Congress, but by the **informal club of 400 people**, whose total wealth exceeds all reasonable limits,

recently said Lawrence Wilkerson, former chief of the Department of State apparatus. Power in America, and, consequently, throughout the West, is in the hands of about 0.001% of the number of people from the population of the country, he said.

Selfishness of global players — the global oligarchy — prevents a consensus even where their interests must be the same — in the international economy, which is in urgent need of new **breakthrough people — saving technologies** presupposing the another, fourth industrial revolution. But this most important human problem is closely linked to the **development of the society itself**, which can not adequately respond to the call of the new industrial or rather post-industrial revolution due to the **ongoing global lost of culture** and destruction of the basis of **spirituality**, leading to a deterioration of the human material.

At the same time the **impoverishment of the human potential** is directly related to the policy pursued in the old Europe of **very liberal projects**, leading to **depopulation** and a **huge deficit of its working-age part**. A. Merkel migration policy, not at least is linked with the hope to infuse by young refugees a **fresh blood** into an **aging Germany**, to provide much-needed influx of **fresh labor force** in the **weakening German economy**. In fact, this **colonial policy of the XXI century**, in general, is not much different from the colonial policy of America in the **XIX century** for the supply of Negroes from Africa to work in the cotton fields of the southern states.

And from this the same **problems of segregation** in migrant enclaves of Germany, France, Great Britain, who needs too the **inflow of fresh labor force**. **Closed from the rest of these countries**, refugee settlement areas, for the most part **Muslims**, separated from the European culture massive amounts of people of other **identities**, are condemning Europe to the **harsh confrontation of different mentalities**, religions and ways of life, which inevitably leads to the **degradation of the continent**. And above all, in the **cultural and spiritual aspects**. This, in turn, doesn't allow to create a **highly skilled resources**, an **educated workforce** capable of dealing with the **time request for a high-tech, people-saving breakthrough** in the economy and industry. Bitter recognition about of very poor quality of fresh labor migrants uttered by the German Minister Frank-Jürgen Weise, head of the agency on the labor market.

The recent regular Davos Forum was forced as a part of his concerned **industrial problems** to pay attention to the **problems of culture**, but culture in the broadest sense as a whole spiritual and civilizational life order. This type must match the level of the new, so-called Fourth, industrialization, and, more precisely, **the challenges of the post-industrial society**. And labor force must meet these requirements. Europe could be ready for the challenge, if not a threat to migration, which calls into question **the future prospects of the Old World** from the destruction of their traditional way of life and culture of the whole in line with the **Christocentric**, which until recently provided a high level of development of the society.

Even those european politics who are quite far from the problems of daily Christian life, but **understanding well the meaning of events**, such as the Hungarian Prime Minister Viktor Orban, have to admit that **the only Christian values, traditional in Europe**, are able to save the people of the continent from the loss of their identity and, therefore, from the collapse of the entire system of the modern European world order. But those **Christian values**, as stated recently that Hungarian leader in Moscow, have been targeted by Islamic radicals.

Bloody clashes between **Muslims and Christians** is one of the most important lines of force, creating a huge **refugee problem**. And as the so-called **Islamic State** of (banned organization in Russia) will **retreat before the pressure** of the military forces of Russia, Syria, Iraq and the Western coalition, it will **tighten** its attitude to **Christians** all over the world, so as not to weaken beneficial to them and their patrons voltage of the axis of conflict between civilizations as it is just happened in Lahore, Pakistan, where an Islamic suicide bomber blew himself up in a **Christian children's center in the celebration of catholic Easter Sunday** and took with him the lives of over 70 people. "**Our objective were Christians**" — clearly stated Ehsanullah Ehsan, a spokesman for the group "Jamaat-ul-Ahrar" — one of the divisions of "Taliban", who swore allegiance to the IG. And this is a **serious threat** considering that, according to **Western intelligence agencies**, the IG threw with the refugees more than **400 terrorists** suicide to attacks in Europe, which may at any moment to commit bloody atrocities.

The right-wing forces in Germany, Poland, Czech Republic, France, Austria, Estonia, Greece, Netherlands, Italy, form the **international political front** against the influx of refugees, saying that by **doing so they protect the world**. They argue that the **refugees are a sign of war**. Millions of refugees — **a sign of a gigantic war**. Refugees in Europe indicate clearly that the war has **knocked on the doors of Europe**. And refugees from other regions of the world in Europe mean that **Europe is already involved in a global war**.

Thus, closely related to the current context the refugee problem can not be solved outside the paradigm of a **decisive change in the whole trend of world politics**, international relations, understanding the **essential nature of the causes of global migration flow**, which is caused by a number of **fundamental processes**. As the most important among them must be mentioned the **liberal projects of standing by force "democracies"**, the **full promotion of Western ideology of human rights** and **unrestricted freedom of the individual**, the **total secularization** that led to the **destruction of traditional cultures**, **dechristianszation of nations**, scrapping the system established on the basis of **common values and meanings** of European civilization of modern states.

Acutely aware of the seriousness of the sharply aggravated situation in the world in connection with the problem of mass refugee, **two prominent Christian figures** of our time, **Pope Francis and Patriarch of Moscow and All Russia Kirill**, setting aside the age-old inter-church disputes exclusively for the first time met in Havana, Cuba on February 12 this year to **jointly appeal to the political leaders of the world**, to all responsible forces of present time urging "**to take immediate actions** to prevent further **displacement of Christians from the Middle East**. Raising our voice in defense of **persecuted Christians**, we empathize with the suffering and the adherents of other religious traditions, who became victims of the civil war, chaos and **terrorist violence**. It is necessary that the international community exert all possible efforts in order to **put an end to terrorism** by means of common, joint, **coordinated action**. We call on all countries involved in the fight against terrorism, to the **responsible, balanced action**."

By this appeal must be taken with the **utmost attention**.

Thank You for attention.

COMMUNIQUÉ
of the XXII Annual Conference
of the International Foundation for the Unity of Orthodox Christian Nations
«Christian comprehension to refugees problem in the light of actual reality»

The International Conference organized by the International Foundation for the Unity of Orthodox Christian Nations in Pirot (Republic of Serbia), 11–14 April 2016 together with members of the Assembly (Parliament), the Government and with the assistance of the President of Serbia, the mayoralty of the city of Pirot, under the spiritual care of hierarchs of the Serbian Orthodox Church, with the participation of members of the Interparliamentary Assembly on Orthodoxy (I.A.O.), representatives of religious organizations, political, social and religious leaders from 24 countries of the world in an atmosphere of high responsibility, carefully and constructively discussed from the standpoint of spiritual and moral values of Orthodoxy complex issues of the Christian comprehension to refugees problem in the light of actual reality. The Conference in the Serbian Pirot, in a country that suffers from a huge load of moral, social and political responsibility for the fate of hundreds of thousands of refugees from the Middle East, Africa and Asia, once founding themselves in Serbia on their way to Western Europe, let impartially see by own eyes and discuss the drama of this global challenge of modern civilization.

With appreciation and understanding of the importance of the Conference proceedings, the forum participants perceived high opinion, expressed in the greetings and letters addressed to them by His Holiness Patriarch Irinej of Serbia, His Holiness the Patriarch of Georgia Ilia II, His Holiness the Patriarch of the Bulgaria Neophyte, the Republic of Serbia President Tomislav Nikolić, the head of the Autocephalous Orthodox Church of the Czech Lands and Slovakia, Metropolitan Rostislav, Chairman of the Parliament of the Republic of Srpska Igor Radojičić, Chairman of the State Duma of Russia Sergei Naryshkin, President of the Interparliamentary Assembly on Orthodoxy (I.A.O.) Sergei Popov, from the heads and the hierarchy of other Christian Churches, leaders and representatives of parliaments and governments of the countries — participants of the Conference, heads of international organizations.

Refugee problem for Christianity is not new, the Conference said. Christianity have found itself face to face to this problem from its very outset in apostolic times. Orthodox Christians in history were many times persecuted, massacred and expelled from their seats, but every time in a new habitat they harmonized by their religious and spiritual practice the whole environment, bringing a peaceful, humane message to other nations. However, the current refugee problem is closely targeted, woven with far-reaching consequences into the global destruction scenario.

The Conference expressed particular concern and compassion for the millions of refugees from Asia, the Middle East and Africa, have been driven from their homeland as a result of mass manifestations of religious intolerance, terrorist cruelties. It was discussed with condemnation the process of forced dechristianization of the Middle East region, where Christians in a mass order banished from these places where Christianity was born. Dechristianization leads to the dehumanization of this historic area, which has a detrimental impact on the fate of all mankind.

The problem of modern mass refugee, the Conference participants noted — is a political problem, but it requires the Christian comprehension and measurement. Without such an approach this tremendous problem can not be understood in its entirety and, therefore, can not be solved. Should be understood that the core of this global challenge in the form of a mass refugee is Christian-Muslim clash that is constantly getting on to ferocity and an increase to the size of conflict between civilizations. For a short period as a result of mass refugee movement the countries of the Old World has resettled about one and a half million people, most of whom are native Muslims, and this explodes the formed ethnic and religious balance of the continent clearly not in favor of Europe, the Conference stated.

Europe has found itself in deep crisis situation as a result of gross political miscalculation of world leaders headed by the United States and the leading countries of the European Union. Exactly in Europe a huge influx of refugees from the East, Asia and Africa surged and flowed across the continent, bringing with it an enormous number of potential problems: from the threat of mass and network terrorism to infectious and epidemic diseases, from the social unsettlement of millions of immigrants to the collapse of the entire long lined up ideas of European house with its tolerance and multiculturalism. One of the causes of the crisis consists in that the traditional Christian religious and spiritual space in Europe as a result of long-term secular-liberal policies proved itself defenseless in the face of other spiritual and cultural phenomenon that came from outside. European Christianity, especially its western wing, is now a demoralized force.

It was noted with deep concern that the first Christians became refugees in the Middle East and North African countries, against which Islamic extremists unleashed a real genocide, and Christians in search of salvation rushed towards Europe. This was followed by a massive wave of refugees in Europe, consisting mainly of Muslim immigrants from Afghanistan, Iraq, Syria, Pakistan, Somalia, Libya, Turkey, and Egypt. They have created a critical mass of refugees rushed from the Turkish camps in Europe. A powerful stimulus for refugees on the way to Europe has become a call of German Chancellor Angela Merkel who invited them to the Old World. At the same time this Conference condemns the cynical

conclusion of EU agreements with Turkey and other Middle Eastern countries, which would in exchange for financial contributions from the EU take back the deportees. The human drama of these unfortunate people still remain without solution.

Refugee problem and closely related terrorism have become, according to the participants of the forum, a barbarian Salafi response to the spiritless Westernization and globalization, with its destructive actions towards traditional family, feminism, pluralism, the so-called LGBT culture, but it is also a kind of Islamic-fundamentalist reaction to injustice, deformity of the world order, social inequality and poverty generated by the hegemony of the capitalist West. This is a specific account in the form of sublimated hatred of the Muslim world, brought by the Salafis liberal West, an attempt to get a cruel revenge for centuries of oppression and humiliation. This is a project of the radical Muslim world order of a barbaric way that offered extremists from Islam. Recent terrorist inhumane acts in the Brussels airport and city metro with numerous victims demonstrated again a bestial nature of the Salafi barbarism.

The liberal policy of the USA and European governance leads the situation with the refugees to a critical issue. Rating of German Chancellor Angela Merkel is rapidly declining. The Right movement is picking up speed under the slogan «No to Islamization of Europe!», which started in the East of Germany, and quickly found its supporters in the center and in the south and the west of Germany. In Germany active civil society groups and organizations began to emerge acting under the slogan «Germany for the germanics», as it was noted at the Conference with particular concern.

Liberalism is retreating under the pressure of the Right forces, said the forum participants. The Rights return, but they do not know what to do with the trend of the world economy and politics launched by Liberals. The EU migration policy is not in the least connected with the hope to pour in by refugee some youth fresh blood into an aging Europe, to provide much-needed influx of fresh labor force into weakening European economy. But in fact, it is the colonial policy of the XXI century in general not much different from the old colonial policy. The main reason for the disharmony of the world – is a continuing furious concentration of capital. At present, according to well-known international organization Oxfam, assets of 62 top billionaires equal to total of 3.6 billion people on Earth. The size of the total capital of 1% of the richest people in the world for the first time exceeded the currently means all the other 99% of the world population. That global inequality generates all the global challenges and in every way impedes the search for ways of harmonious human development in all areas — from financial and economic to the social and spiritual, the Conference made its conclusions.

Another important conclusion of the forum was the statement that the selfishness of global players — global oligarchy — prevents a consensus even where their interests must be the same — in the international economy, which is in dire need of new breakthrough of people saving technologies involving the next, fourth in a row, industrial revolution. But this most important human problem is closely linked to the development of the society, which can not adequately respond to the call of the new post-industrial revolution due to the ongoing global lost of culture and destruction of the foundations of spirituality.

The recent regular Davos Forum, as discussed at the Conference, was forced as a part of his concerned industrial problems to pay attention to the issue of culture as a whole spiritual and civilizational life order. This type must match the level of the new, so-called Fourth, industrialization. Europe could become ready for this challenge, if not a threat to migration, which calls into question the future prospects of the Old World from the destruction of their traditional way of life and culture of the whole in line with the Christocentric, which until recently has provided a high level of development of the society.

Thus, the Conference declared, the refugee problem, closely related to the current context, can not be solved outside the paradigm of a decisive change in the whole trend of world politics, international relations, understanding the essential nature of the causes of global migration flow, which is caused by a number of fundamental processes. As the most important among them may be mentioned increase in social inequality, selfishness of the leaders of the Western world, the liberal projects of standing by force democracies, the full promotion of anglo-saxon ideology of human rights and unrestricted freedom of the individual, the total secularization that led to the destruction of traditional cultures, dechristianization of nations, scrapping the system established on the basis of common values and meanings of European civilization of modern states.

The Conference highly appreciated the efforts of the International Foundation for the Unity of Orthodox Christian Nations to gather on its authoritative forum for the twenty second time influential political, community and religious leaders from various countries to discuss urgent problems of the world agenda in the light of the Orthodox thinking, the development of socio-political and intercultural dialogue in order to strengthen and promote the Christian spiritual and cultural values and meanings in the life of the peoples of Eastern identity and traditions.

The Conference participants expressed their gratitude to the President and the Government of the Serbian Republic, the mayoralty of the city of Pirot, the hierarchy of the Serbian Orthodox Church for the warm and cordial reception, as well as political, social and business circles of the country for the provision of comprehensive assistance in organizing this important international forum at a high level.

Pirot, Republic of Serbia, April 13, 2016
